<http://support.kusmw.kumc.edu/files/BF2SP-OSX10.7-1200.ZIP>

<http://support.kusmw.kumc.edu/files/BF2SP-OSX10.8-10.10.zip>

Unzip the file, and run the MX-PKX.pkg or (.dmg then MX-PBX1) Choose Continue (2x), Agree, and Install. You should be prompted for your local user account password. Type it in and choose OK. The install should finish after that. Click Close. Open up System Preferences (Apple icon in upper left) and Choose Print & Fax Click the plus (+) sign to add a printer

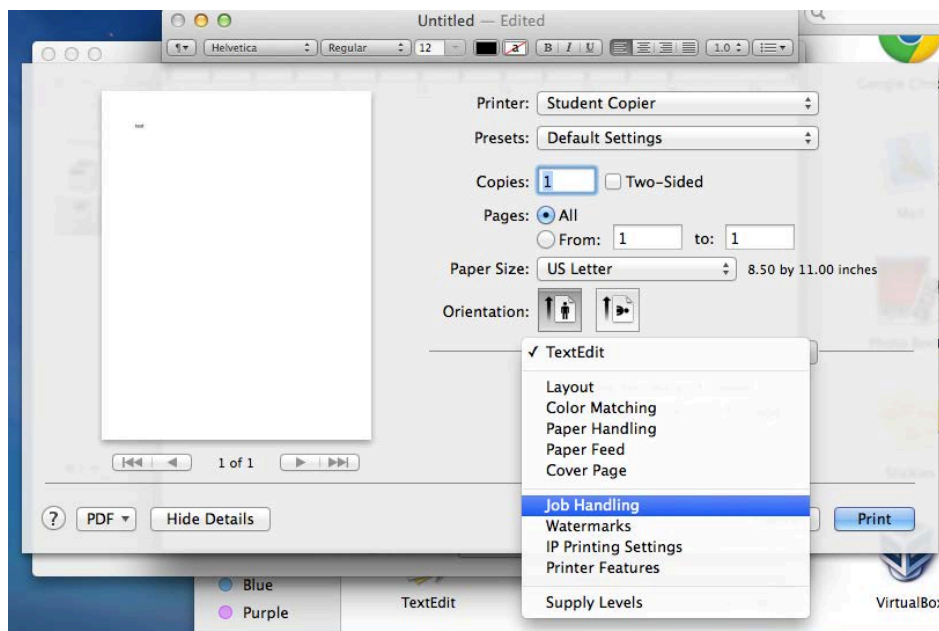

On the Add Printer dialog that pops up, use the diagram below to make your settings identical. There are two Copiers and their addresses are 192.168.171.208 and 192.168.171.184

Match the settings listed below to the Installable Options window that pops up.

Once the printer is installed, open a document in TextEdit and attempt to open the Print dialog. With it open, choose the Student Copier and click the arrow. Below that, look for a drop-down menu has TextEdit selected. Drop-down that menu and choose Job Handling.

Choose the Authentication option, and then chose User Number. Type in the number assigned to the user by SOP staff and then click the padlock next to the text box to save the credentials for future printing, and click print.

The screenshot shows a software window titled "Job Handling" with a dropdown menu. Below the title bar are three tabs: "Retention", "Authentication", and "Custom Folder". The "Authentication" tab is active. On the left side, there are two radio buttons: "User Authentication" (unselected) and "User Number" (selected). Below "User Authentication" are two text boxes labeled "Login Name:" and "Password:", each with a padlock icon to its right. Below "User Number" is a text box with a padlock icon to its right. On the right side, there is a section titled "Job ID" containing three text boxes: "User Name:" with the value "wichita\_admin", "Job Name:" with the value "Untitled", and an empty text box with a padlock icon to its right.
